## DESCRIPTION

Built with impressive features and high-quality specifications, Project NB066 is a highly anticipated superyacht from the Turkish shipyard AES Yacht. Featuring a semi-displacement steel hull and an aluminium superstructure, the new build is set to offer the utmost stability and comfort during cruising. A low level of fuel consumption onboard is also a desirable feature for those environmentally conscious owners.

Hot Lab Yacht Design Milano is responsible for both the interior and exterior design of the new project; all in part of the commitment to a cohesive and well-planned aesthetic.

A beach club and large sundeck with a jacuzzi are connected to the main lounge, creating an indoor-outdoor social environment that is ideal for entertaining guests.

Fitted with two MAN - D2868LE425 (588kW @ 2100 rpm) Diesel engines, NB066 is set to provide a top speed of 14 knots and a range of 3,500 nautical miles when cruising at 11.5 knots, for maximum comfort with minimal output of vibrations and noise.

---

## ACCOMMODATION

Project NB066 offers a luxurious master suite on the main deck and large-sized VIP suites on the upper and lower decks, each one providing ample space and comfort for the owner and guests.
